In returning the enclosures to your T B No 43 dated 6th November 1912 I have the honour to state that the book "Essentials of Astronomy" is an excellent publication The authors have taken pains to give correct astronomical information in a simple and easy style English words are used whenever corresponding Sanskrit terms are not available This practice is to be preferred to that of ~~xxxxx~~ coining new names which are more difficult to understand than the English words A good feature of the book is that there is no reference to Astrology It deserves the patronage of the Educational Department The book may be supplied to all school libraries and recommended as a prize book
